

Hangars

Existing hangars at Monte Vista Municipal Airport are used for aircraft storage and maintenance. The buildings are located northwest of the apron area. Hangars are accessed by a 35-foot wide taxi lane. Asphalt taxi lanes provide access to individual hangars. The apron area contains approximately 6,700 square yards of space.

Hangar sites are available. Please inquire with Art Jones at (719) 852-3241.
